## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, drawn to segmenting an image by obtaining and clustering upper and lower last circles, classified in class 382, subclass 225.
  - II. Claim 10, drawn to segmenting an image using a preprocessor, a feature value calculator, a main region section unit, and an image graph simplification unit, classified in class 382, subclass 173.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the steps of claim 1 do not necessarily have to be implemented by the elements of claim 10; and the elements of claim 10 do not necessarily implement the steps of claim 1. That is, the features of claims 1 and 10 are distinct and impart the claims separate utility. For example, claim 10 does not require any generation or processing of upper and lower last circles, and claim 1 does not require preprocessing the image. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and different required search, restriction for examination purposes as indicated is proper.

Art Unit: 2623

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even if the requirement is traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
